ALLOWABLE SUBJECT MATTER

Claims 22-25,32-65, 75-99 and 100-105 are allowable over the prior art of record because none of the references teaches or suggests: The method of regenerating optical signals in an all optical cross-connect switch using switch fabric and one or more smart port cards; A method/apparatus of bridging optical signals in optical network equipment using the steps of receiving an optical signal, splitting the optical signal into at least two similar optical signals; processing the at least two similar optical signals in the optical network equipment and selecting one of at least two outputs of the optical network equipment that has a resultant optical output signal responsive to the processing of one of the at least two similar optical signals in the optical network equipment; A method of increasing the reliability in optical network equipment by choosing between two first and second processed/converted (optic to electric) and selecting the first or second processed signal as the output of the optical network equipment and ; A method of regenerating optical signals in an all optical cross-connect switch comprising: converting a first optical signal into an electrical signal, converting the electrical signal into a second optical signal, the second optical signal being responsive to the first optical signal and forming an optical path through an optical switch fabric of optical switches over which optical signals can be transported through the optical cross-connect switch.

DOUBLE PATENTING

Art Unit: 2883

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-21, 26-31 and 66-74 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-36 of prior U.S. Patent No. 6,650,803. This is a double patenting rejection.

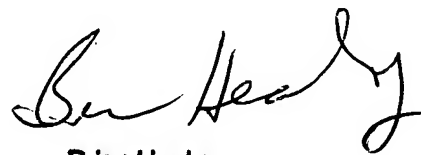

A copy of PTO-1449 will be included in this office action.
